

## **Programme Control and Planning Specialists**

### **Attractive Salary & Benefits**

### **Heathrow**

Heathrow isn't just the country's largest airport. It's also the UK's only hub airport, our gateway to the world and a major global destination. We have a budget of nearly £4billion for the capital investment programme to modernise and improve our airport. As you'd imagine, this is one of the country's largest and most exciting construction programmes which will significantly impact the experience of each and every passenger and includes the construction of a new, more environmentally friendly and efficient Terminal 2, as well as further development of Terminals 3, 4 and 5.

In a programme of this scale and importance it is fundamental that we have the competency, processes and systems to ensure that all Programme Delivery Organisations are given the timely and accurate information and advice necessary to act as 'Intelligent Clients' - capable of delivering work of the highest quality and integrity, to time and under budget.

The chance to play a vital part in the modernisation of Heathrow Airport presents an excitingly diverse spectrum of opportunity. From providing an innovative and creative Programme and Project Controls Service to the Programme Delivery Teams and Controls Directorate, to leading the Schedule function with a clear focus on continuous improvement, these roles will allow you to join our team in an influential position with a well-defined progression plan. You can look forward to dealing with unparalleled challenges as a part of these uniquely interesting programmes and in return, can expect excellent benefits packages.
